

**Intro:**

Good evening my name is Maribel Guzman and I am a resident of Sherman Heights.

**Problem:**

Our communities are the most at risk of air pollution. I have an 8 year old son with asthma. I wasn't aware that indoor and outdoor air pollution can be an asthma trigger. Now that I am more informed it all makes sense to me.

**Solution:**

I want the city to use more clean energy, make homes more healthy and use less polluting trucks!

**Action:**

The city should adopt strong 2020 emissions goals for the CMAP. This will make the environment safer for my son and my community.
